

# Impact of the Inflation Reduction Act on Medicare Part D

For the first time in Medicare's history, the amount of money that beneficiaries will have to pay for their prescription drugs each year will be capped, thanks to the provisions of the Inflation Reduction Act. The new law makes other changes to Medicare Part D drug benefits, including putting a limit on out-of-pocket payments for insulin and making vital vaccines free.

Here is the implementation timeline:

## IMPORTANT: How will these changes impact the Electric Boat Retiree Prescription Drug Plans?

The Electric Boat Retiree Prescription Drug Plans will continue to provide the same robust prescription drug formulary, covering all Medicare Part D prescription drugs and many Medicare Part D excluded drugs. However, in 2025, the **Limited Rx plan will no longer be offered**. Once the Coverage Gap is eliminated and all Part D plans have a member out-of-pocket cap of \$2,000, the Unlimited Rx plan and Limited Rx plan become essentially the same plan.

In 2025, the Unlimited Rx plan and the Value Rx plan will be available, and the 2024 monthly premiums are **guaranteed for THREE years** from January 1, 2024 through December 31, 2026.

**VACCINATIONS COVERED AT NO COST UNDER EXPRESS SCRIPTS
